Late homework will not be accepted.

Name: _________________________________

Read chapter 7.

1. Do problem 2 on page 333 of the text. Make sure you comb through the list of functions in Table 6.1 before starting this assignment. You may find something there to help.

2. Do problem 2 on page 409 of the text.

(continued on back)
3. Do problem 3 on page 410 of the text. The subroutine has four arguments. The one representing centimeters is set prior to the calling of the subroutine. The subroutine sets the values of the three variables/arguments corresponding to yards, feet, and inches.
